UNKNOWN NORDIC

Unknown Nordic is a Danish design and manufacturing company. With its roots in the Scandinavian design traditions Unknown Nordic creates long lasting functional and aesthetic products of very high quality.

Natural resources are all around us. At Unknown Nordic we specialize in fibers extracted from volcanic lava stones. Nature has generated lava for millions of years and internal eruptions have helped to form the crust of the earth. We retrieve the stones from the crust and transform them into fibers.

All the products from Unknown Nordic are handmade, making each products unique. The shape is the same but the pattern varies together with the hands manufacturing the products.

A signifacnt sign of our design is the open pattern. A reflection of how nature is very much part of . We learned how animals find comfort and safety from shelters in the tree crowns and opted to copy this into our designs. Sitting in one of our Bios Hanging Loungers will give you the same feeling of comfort and safety.

What we create is

LAVA SHAPED BY HAND

LAVA SHAPED BY NATURE

Products made from Volcanic basalt fibers has some extraordinary properties. Besides allowing us to create natural shapes the most significant properties are:

- Low weight
- Strength 3 times the strength of steel
- Very long lifespan
- Resistancy to salt and chlorine
- Heat Absorbing
- No maintenance
- Weatherproof - can stand outside all year round

The award winning designer Raimonds Cirulis has excelled in developing the technology allowing us to create spectacular natural shapes and airy patterns without compromising the quality and safety. In fact we guarantee a weight load of 250 kg inside every one of our Bios Hanging Loungers.

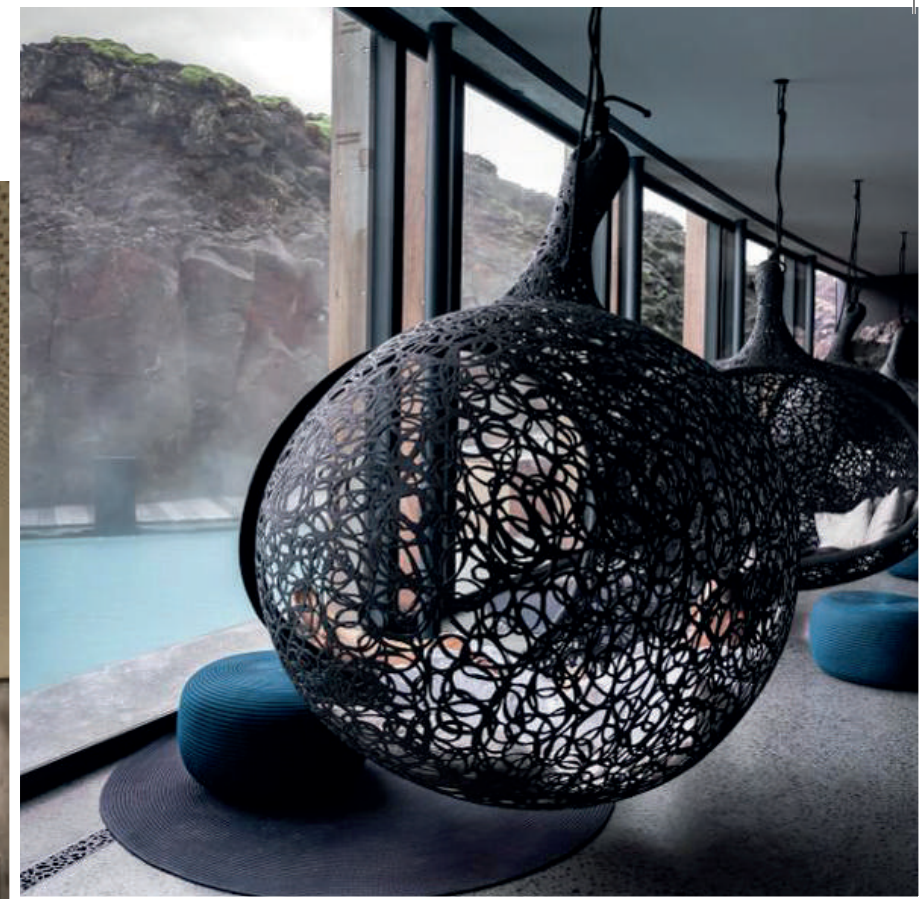

FITTING IN

The collection from Unknown Nordic is the perfect choice for the exterior environment. We offer both organic and streamlined designs. And everything can even be customized with regards to pattern and color.

The furniture displayed on this scenic terrace is:

- LAVA LOUNGE SOFA
- X-CHAIR
- RACE TABLE
- HUG CHAIR
- WELL CHAIR
- LAVA NEST FIRE PIT

Suitable for spa areas

The furniture is perfect for a spa areas as they are resistant to salt and chlorine.

The bios comes in 5 models and offers room for 1-3 people. The Bios are tested to carry up to 250 kg and are certified for use in commercial areas.

LAVA NEST FIRE PIT

The new product LAVA NEST FIRE PIT is the result of a cooperation between RUFER from Switzerland and Unknown Nordic. RUFER has long been recognized as a top quality designer and manufacturer of steel products. Together we have developed this new product where we combine steel and lava stone to create this aesthetic LAVA NEST FIRE PIT.

The cooking area of LAVA NEST FIRE PIT is made completely from stainless steel offering optimum conditions for cooking.

Taking advantages of lava being heat absorbing.

Besides being aesthetic the use of lava does wonders for the product. The outer shield of lava protects people and especially children from the hot steel surfaces. The design of the LAVA NEST FIRE PIT is made so that the shield of lava will only obtain a minimum of the high temperatures created by the fire. Actually it will offer a comforting warmth when used on a cold day.

Comfortable seatings

The furniture collection from Unknown Nordic offers chairs with very good ergonomics. With the intriguing pattern and organic shapes of the design the chairs offers an eye-catching solution to any environment.

And you can sit safely on the black surface because the material is heat absorbing making it much better than most other materials to withstand the impact of the sun.

BIOS HIDE

The Bios Hanging chairs is the most eye-catching piece of furniture. The perfect combination of aesthetic and functionality.

The Bios Hide is truly extraordinary offering room for 2-3 people. The Bios is tested to carry up to 250 kg. It is completely weatherproof and can remain outside all year long. And with the cover on it can be used even during winter. It is furthermore resistant to salt and chlorine and needs no maintenance.

With its open and aesthetic handmade pattern the Bios Hide is the perfect place to find comfort and relaxation. Not only does the appearance of the Bios Hide have a close resemblance to that of a tree crown, this iconic hanging chair also gives the user the same feeling of comfort and safety as the tree crowns offers to its occupants.

LAVA LOUNGE

LAVA LOUNGE

The LAVA LOUNGE sofa is a modular lounge system where customers can combine the modules as they please. As standard the LAVA LOUNGE consists of 1 Corner section, 2 Center sections and 2 End sections + 1 Lounge Table. The measurements for the standard solutions are 300 x 300 cm.

OPENNESS AND LIGHTNESS

With its open structure the LAVA LOUNGE is a great example of the strength of our material. Made completely without steel this sofa offers a very comfortable environment with a seating height of 40 cm and seating depth of 53 cm. The luxury cushions are made with Agora Fabric and quick dry foam.

BIOS ALPHA

Fitting perfectly in with the surrounding nature the BIOS ALPHA is a magnificent piece of furniture. This high end hanging chair with a length of 235 cm offers comfortable accommodations to everyone. Here it is equipped with the LUXE CUSHION in color beige café.

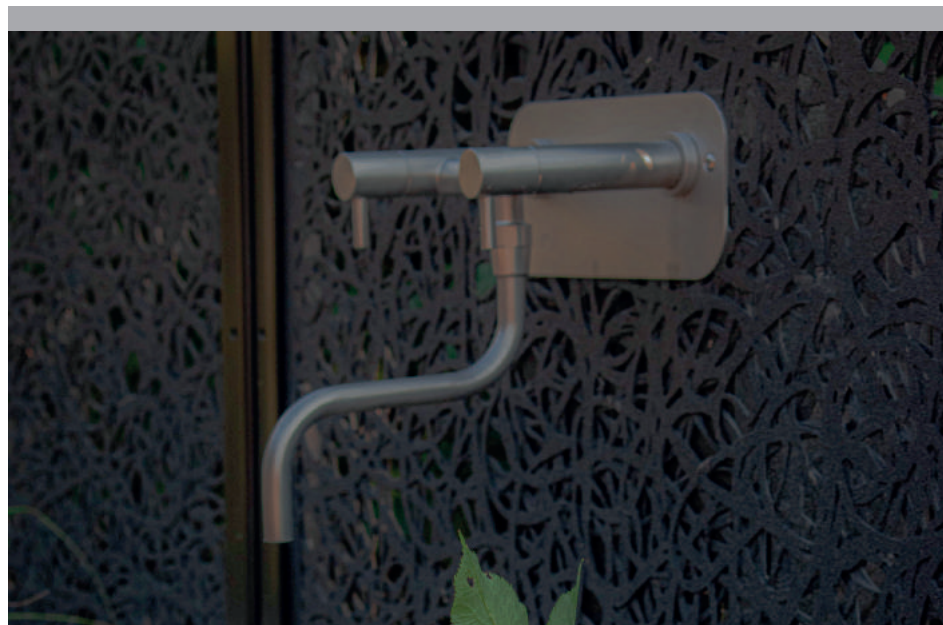

PANELS.

Deco facade panels, fence panels, ceiling panels and partitions.

Every piece of lava panel is handmade and unique. The panels can be shaped and customized to fit the overall design of a hotel, restaurant etc. With the ability to absorb sound the lava panels contribute to improve the acoustic in high-noise environments. Being resistant to salt and chlorine lava panels are perfect for spa- and wellness areas as well. The panels are for both indoor and outdoor use and no maintenance is required. The panels can be cleaned with water, steam or a high pressure water cleaner.

The panels comes both in standard sizes and customized. Furthermore the color and pattern can also be customized.

Ceiling Panels

The Ceiling Panels are here installed in a high end Optician shop in Austria. The panels are installed as a floating ceiling placed 30 cm below the concrete ceiling. All ventilations, cables etc. are concealed by the panels and for the lighting cutouts have been made for a high end finish.

The panels also offer a significant noise reduction to the store thus the sound waves are "swallowed" by the aesthetic pattern of the panels.

Partitions & Room Dividers

Whether it be a restaurant, a conference room, a hall or similar, the LAVA PANELS can easily be installed.

Coming as STAND ALONE or BUILT TOGETHER solutions. And can also be delivered with wheels for a more flexible solution.

On this picture: Room Dividers Stand Alone

Room Divider Movable

Offering both a clear division and significant noise reduction without stealing the aireness of a room, makes the LAVA PANELS an optimal solution when creating spaces.

On this picture: 3-part Room Divider Movable
Choose with or without Planters.
